Lean Architect - Capability Statement

CAGE: 9XG88   UEI: UJ56GG2GZBF8

Lean Architect is a technology company dedicated to helping architects, engineers, and the construction industry cut down time and money spent on documentation.

Utilizing advanced technology and AI, we automate tedious, repetitive tasks so your team can focus on sustainability, user experience, and data-driven design.

This shift allows firms to improve overall construction efficiency and design quality, while achieving a higher profit margin.

Past Performance

Lean Architect's employees have decades of experience on:
Commercial Buildings - Data Centers
Multi-Family - Industrial Buildings - Parking

Sample Projects:

- Iron Mountain and QTS Data Centers
- The Farm parking garage
- Newcrest Image Office Building

Scope of work: Three of numerous projects in which our team members played key roles, collaborating and leading through schematic design, construction documentation, and construction administration.

Core Competencies

AUTODESK REVIT	Building Information Modeling
Revit API	Computational Design
Grasshopper	Generative Design
Rhinoceros	Digital Fabrication
AI	Artificial Intelligence

Differentiator

- 100 percent of coders are active engineers or architectural designer
- AI does not replace the architect, it empowers them
- Easy cross connection between the whole industry from design to construction
- Easy to learn/use technology
